北京航空航天大学撰写学位论文规定

Guidelines of Beihang University for Writing Theses/Dissertations

(Revised in July 2020)

A thesis/dissertation is deemed a piece of work to demonstrate the creative outcomes and ideas of the author in his/her scientific research and to apply for a degree.

For a Master's Degree, the thesis should show evidence that the applicant has mastered the basic theory and systematic knowledge in a specific research field, has gained new insight into the research subject, and has acquired the capability of conducting research.

For a Doctoral Degree, the dissertation should show evidence that the applicant has demonstrated mastery of a solid basic theory and systematic knowledge in a specific research field, made creative results on his or her scientific research or specialized technology, and acquired the capability of conducting research independently.

"Guidelines of Beihang University for Writing Theses/Dissertations" is formulated so as to improve the quality of the dissertation for a postgraduate and standardize its format, which is based on the provisions of the "National Standard Format of the People's Republic of China for the Preparation of Scientific and Technical Reports, Dissertations and Scientific Papers" (GB/T 7713.1-2006).

Chapter 1: Basic Requirements and Content of a Thesis/Dissertation

1.1 Basic Requirements

The thesis/dissertation should be accurate, logical, coherent, and convincing.

All concepts in a thesis/dissertation should be clarified accurately. Analysis should be in-depth and comprehensive. Terms and abbreviations should be explained in their first use. All views made in the research should be supported by relevant references and reliable data. All illustrations should be relevant, accurate, comprehensive, and consistent. The used measurement units and drawing norms should comply with the national standards of the People's Republic of China.

The academic level of the dissertation shall meet the requirements of the "*Temporary Implementation Regulations on Academic Degree Conferrals of Beihang University*".

1.2 Content

The content should include: background, basis, and significance of the research; a literature and related research overview, research and design program, experimental methods, equipment and results; important calculations, data, diagrams, curves and relevant analysis; necessary appendixes and catalogue of references.

For a cooperative project, the dissertation should focus on his/her own research of the author. It should clearly indicate the achievements jointly made by the author and his/her tutor or other co-workers.

Chapter 2: Main Structure and Binding Order

The thesis/dissertation should consist of 13 parts and be bound in the following order:

(1) Front Cover (Chinese & English versions)

(2) Title Page

(3) Statement of Originality and Authorization Statement for Thesis Use

(4) Abstract (Chinese)

(5) Abstract (English)

(6) Contents

(7) Lists of Diagrams and Abbreviations/Acronyms/Terms

(8) Body of Thesis/Dissertation

(9) References

(10) Appendixes

(11) Research or Academic Achievements during Master/PhD Study Period

(12) Acknowledgements

(13) Author Profile

Chapter 3: Writing Standard and Printing Styles

3.1 Writing Standard

3.1.1 Language

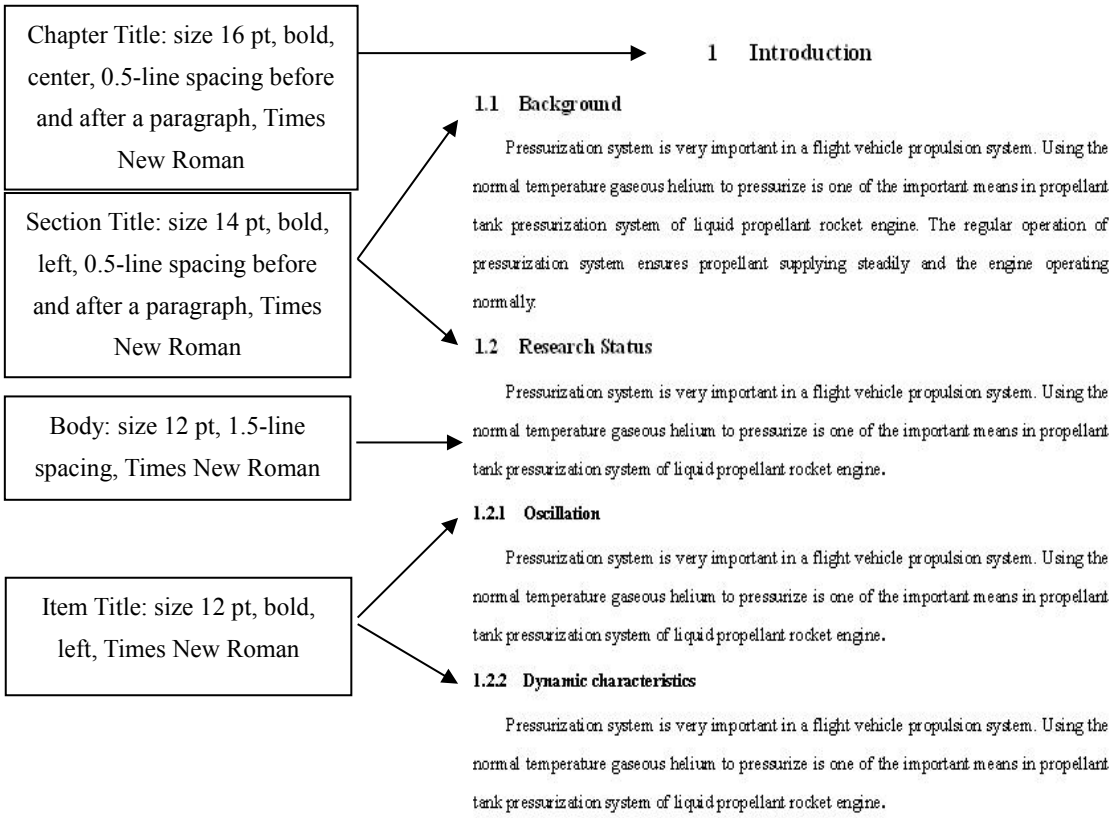
For international postgraduate students, the thesis/dissertation's content, main body, and acknowledgements and other parts can be written in English, but the front cover, title page, and statement of originality and authorization statement for thesis use should be written in Chinese. The abstract should be written in both Chinese and English.

3.1.2 Paper Size and Printing Style

All dissertations should be typed, arranged and printed on standard A4 Paper (210× 297mm, 80g) of white color. All of the front cover (the Chinese and English versions), the title page, and statement of originality and authorization statement for thesis use should be printed on a single side of paper. All the others should be typed on both sides of paper (If the thesis/dissertation contains fewer than 100 pages, then it should be printed on one side of paper. Single-side printing is allowed on paper with the dimension of 210×297mm, 70g.) It should be easy to read, reproduce and take microfilm.

3.1.3 Font Style and Size

Thesis/dissertation title: according to the specific regulations
Chapter title: size 16 pt, bold, center, Times New Roman
Section title: size 14 pt, bold, left, Times New Roman
Item title: size 12 pt, bold, left, Times New Roman
Body: size 12 pt, Times New Roman
Research or Academic Achievements during Master/PhD Study Period, Acknowledgements, Author Profile: 12 pt, Times New Roman
Page number: size 10.5 pt, Times New Roman
Number and letter: Times New Roman
Sample:



3.2 Page Layout

3.2.1 Page Margin and Line Spacing

Page margins:

Top margin = 25 mm
Bottom margin =25 mm
Left margin = 25 mm
Right margin =25 mm

Line Spacing: Chapter, section, and item titles should be in single spacing. 0.5 line spacing is required before and after a paragraph.

In the body paragraphs, 1.5-line spacing without blank line spacing before or after a paragraph is required.

3.2.2 Header and Footer

Both header and footer must be 15 mm from the edge.

The header should start from the main body of the thesis/dissertation (Introduction or Chapter 1). Odd and even numbered pages should be differently labeled. For odd numbered pages, the header should indicate “BUAA Academic Dissertation/Thesis for Doctoral/ Master’s Degree”. For even numbered pages, the header should indicate the chapter sequence and title, for example, “Chapter 4 Strategic Analysis on Cultivating Chinese Enterprises’ Competitiveness”. The header should be in the font style of 9 pt Times New Roman.

3.2.3 Page Numbers

All pages of the thesis/dissertation from the start (introduction, main body, and conclusion) to finish (References, Appendixes, Research or Academic Achievements during Master/PhD Study Period, Acknowledgements, Author Profile) must be continuously paginated in 10.5 pt Arabic Number, with the page numbers in the center of the footer.

The front cover, statement of originality, and authorization statement for thesis use should not be paginated.

Abstracts, content, lists of diagrams and abbreviation/acronyms/terms are consecutively numbered in 10.5 pt Times New Roman Number, with the page number in the center of the footer.

3.3 Technical Terms

Technical Terms and names of equipment and components shall adopt the terms or names stipulated in national or ministerial standards. For terms not specified in the standard, general industry terms or names should be used. Terms should be uniform throughout the text. Special or new terms should be described or annotated in the appropriate places.

The full expression of Technical Terms should be clearly indicated in their first use.

Notes should be given when necessary.

3.4 Physical Quantities, Symbols, and Measurement Units

All physical quantities, symbols, and measurement units should comply with the provisions of the "China Statutory Measurement Units" as released and implemented by the People's Republic of China, and national standard "Quantity and Units" (GB3100-3102).

3.5 Diagrams, Tables, and Annotations

Diagrams and tables should be located below the text of their first reference. If there is not enough room to arrange them on the same page, they should be placed on the following page.

3.5.1 Diagrams

Diagrams include curves, structure diagrams, schematics, illustrations, block diagrams, flowcharts, record diagrams, layout diagrams, maps, photos, plates, etc.

The diagrams should be self-explanatory. All diagrams, regardless of which chapter they are in, should be numbered "Diagram 1, Diagram 2, etc. …" in sequence from the beginning to the appendix of the thesis/dissertation.

The diagram title should be concise in 10.5 pt, bold Times New Roman. There should be two spaces between the diagram number and title. The number and title of the diagram should be centered below the diagram. The text in diagrams should be in 10.5 pt, Song typeface style, numbers and letters should be in 10.5 pt, Times New Roman. The graph must be marked with "quantities, normative symbols, and units" in the X-axis and Y-axis. They can be omitted only when their indication is unnecessary. In addition, the symbols and abbreviations of the marked quantities should be consistent with those in the text.

Sample:

Diagram Title: size 10.5 pt, bold, Times New Roman

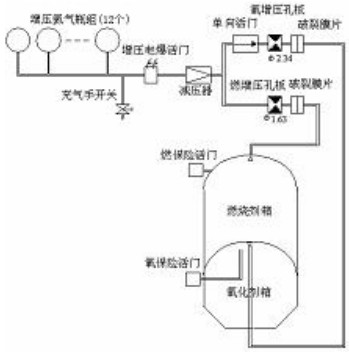


Figure 1 Pressurization System Sketch

The subject and the main part of photograph are required to be in sharp outline to facilitate plate making. If the enlarged or reduced reproductions are used, they must be clear and of moderate contrast. There should be a scale indicating the size of the object on the photograph.

3.5.2 Tables

Tables should be self-explanatory. The content and testing items are usually read horizontally from left to right. The data is read vertically according to its order.

All tables, regardless of which chapter they are in, should be numbered "Table 1, Table 2, etc. …" in sequence from the beginning to the appendix of the thesis/dissertation. Even if there is only one table, it should be marked as "Table 1". The table title should be concise in 10.5 pt, bold Song typeface style, numbers and letters should be in 10.5 pt, bold Times New Roman. There should be two spaces between the table number and title. The number and title of the table should be marked in the center above the table. The text in the table should be written in 10.5, pt Song typeface style, numbers and letters should be in 10.5 pt, Times New Roman.

If a table cannot be displayed on one page, it can be displayed continuously with the same layout on the following page. For example:

Table 1: Result of Plan 1 (continued)

The table title and units should be repeated for the continued table.

Sample:

Table Title: size 10.5 pt, bold, Times New Roman

Table 1 Parameters

No.	Parameter	Unite	Value	Remark
氦气气瓶				
1	Pressure	MPa	23	
2	Temperature	K	288.15	

3.5.3 Annotations

If a diagram or a table needs annotations, the annotations should be written below the diagram or table in the following form: "annotation + Arabic number + colon". For instance, "Annotation 1:" The text should be written in 10.5 pt, Times New Roman.

3.6 Formulae

Each formula should be ordered and labeled according to chapters. The label should consist of a pair of two numbers or a pair of a letter and a number in parenthesis. The label should be listed on the right side of the line end.

For example, “(1.1)” indicates this is the first formula in Chapter 1; “(A1)” indicates this is the first formula in Appendix A. The formula cited in the text generally marked as “see formula (1.1)” or “by formula (1.1)”.

3.7 Notes

Notes can be used to explain some terms and situations and should be listed on the bottom of the same page or at the end of the same article. The note signal in the text should be marked as [note 1] in Arabic numbers.

3.8 Confidential Dissertations

Declassification of dissertations is encouraged as much as possible. Beihang University shall reduce the number of unnecessary confidential dissertations. The declassification process should generally remove the technical indexes and key data related to the application background and confidential items, thus turning the dissertation into a pure theoretical and technical research that can be published publicly. The confidentiality of technologies and methods should be protected by applying for patents, rather than turning degree dissertations into confidential ones.

The confidential applications for dissertations that do require confidentiality should be submitted by supervisors based on the situations of the dissertations. Supervisors are required to complete the “Application Form for Confidential Dissertations for Graduate Students of Beihang University” (application for “confidentiality level” and “confidentiality period”), which shall be approved by the Confidentiality Office of Beihang University in accordance with the national confidentiality regulations. The approved confidential dissertations should be marked with the corresponding “ ☆ ” and “Confidentiality Period” on the top-right corner of the cover and title page. The copy of the “Notice of Confidential Dissertation Approval” shall be attached to the end of the dissertation. The confidentiality level can be divided into “Secret”, “Confidential” and “Top Secret”, while the confidentiality period can be divided into “3 Years”, “5 Years”, “10 Years” and “Permanent”, for example, “Secret ☆ 5 Years”.

Confidential dissertations are not allowed to be typeset, stored, printed and transmitted on unclassified computers, copying and binding should also be carried out in specified places. Authors should be present to follow up the whole process.

Chapter 4: Specific Formats for Each Section of Thesis/Dissertation

4.1 Front Cover

Front cover: The Degree Office of Graduate School has provided standard color blank dissertation cover for free at the designated link (see: http://graduate.buaa.edu.cn → “Degree Discipline” → “Related Forms and Instructions for Download” → “Instructions on the Place for Copying and Binding Dissertation”. Dissertations sent for review and finalized should use the standard cover. The fees for copying, cover printing and binding of dissertation are all paid by graduate students.

Chinese Library Classification Number: selected according to the subject content of dissertation in

accordance with the "*Chinese Library Classification*" (available on the library website of Beihang University).

Dissertation Number: "The Agency Number of Beihang University (10006) + Student ID" (subject to the student number displayed in the "Graduate Education Management Information System"), such as "10006SY0104106", "10006BY0005101", etc.

Confidentiality Level: Confidential dissertations must be directly indicated with the confidentiality level and the corresponding confidentiality period, except for public dissertations.

Dissertation Title: The title of the thesis/dissertation should be accurate and concise, with no more than 25 words. A subtitle can be used if necessary. The subtitle should be in a subordinate position and could generally be introduced with a dash "—" in the next line of the title. Dissertation title should avoid using uncommon abbreviations, acronyms, characters, code words, and formulas, etc.

Discipline Specialties: The disciplines should be based on those in the catalog of disciplines approved by the Academic Degrees Committee of the State Council for granting doctoral and master's degrees, and cultivating postgraduates. Professional graduate students should use the title of the corresponding professional degree (e.g., Master of Business Administration) or engineering field (e.g., Aeronautical Engineering).

Supervisor: The signature of supervisor should be approved by the Graduate School, and generally only one supervisor. If there is an associate supervisor or co-supervisor approved by the competent department, one additional supervisor could be added to the list.

Training School: The full name of Training School should be filled in accurately.

4.2 Superscription Page

The information in the superscription page of the thesis/dissertation should be more detailed than on the front cover page. In addition to the explanation of the relevant item in the cover page, the explanations of other items in the superscription page are as follows.

Research Direction: Only one research direction can be written in the dissertation, which should be more specific than the secondary discipline of the discipline specialty, but broader than the coverage of the key words of dissertation, usually corresponding to the Subject Classification Number.

Subject Classification Number: Refer to the "*Subject Classification and Code*" (GB/T 13745) (can be left blank and filled in by Dissertation Custody Department).

Application for Degree Level: Degree level should be applied according to the name stipulated in the "*Interim Measures for Implementation of the Regulations of the People's Republic of China on Academic Degree*s", filling in the "Discipline Category + Degree Title". There are 13 academic disciplines and professional degree categories (e.g., Engineering, Business Administration, Public Administration, Software Engineering), for example, Master of Engineering, Master of Arts, Master of Engineering, Master of Business Administration, Master of Public Administration, Master of Software Engineering, Doctor of Engineering, Doctor of Management and Doctor of Science, etc.

Completion Date: Including the period at school (from entrance to graduation), submission date (time for dissertation submission and review), date of Thesis Defense, date of Degree Conferment; except for the date of Degree Conferment, all other dates should be accurately indicated and written in Arabic numbers.

Degree Awarding Agency: Beihang University.

4.3 Statement of Originality and Authorization Statement for Thesis Use

The statement should contain names and signatures of both the author and his/her tutor along with the signature date.

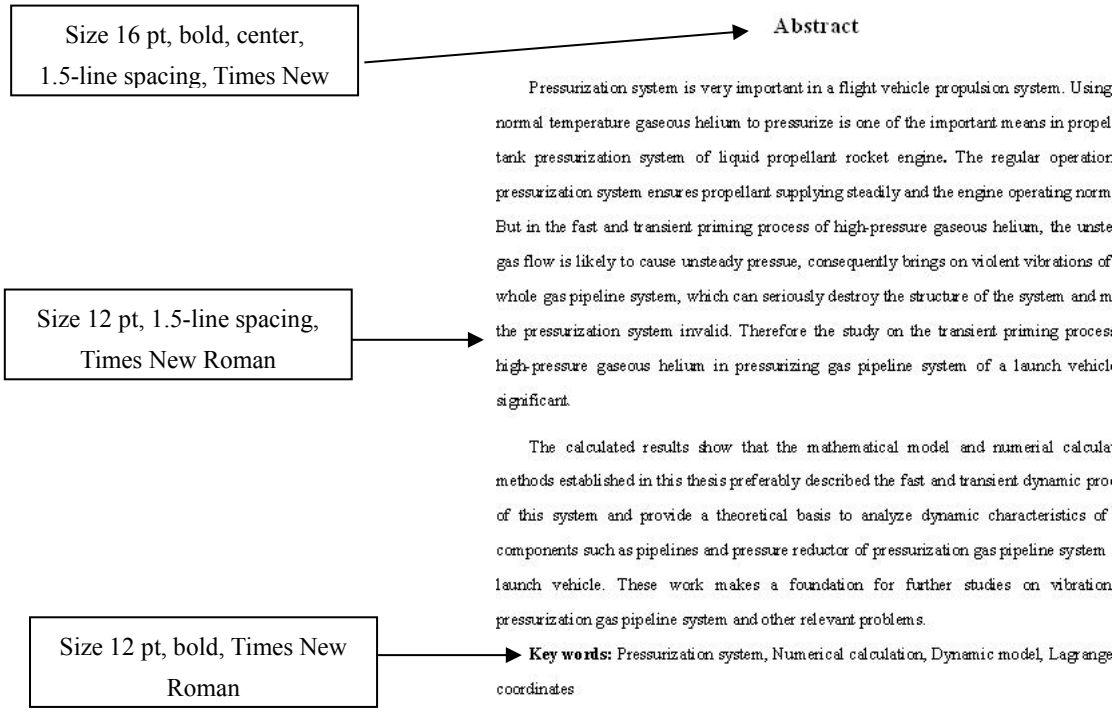
4.4 Abstracts

Chinese Abstract: The title of “Abstract”, the body and keywords. For both English and Chinese abstracts, the keywords must be indicated in prominent characters on a separate line at the bottom of the abstract.

The abstract should be precise and concise. It should reflect the significance, methodology, and the results or conclusion of the research. The Chinese abstract of the Doctoral dissertation should contain 800-1200 words, while that of the master's thesis should contain about 500 words.

Keywords: Keywords are a set of words or terms selected from the dissertation to reveal the subject content of the whole text for users to find the literature, which should be used in line with the standardized words in the word list (refer to the corresponding technical terminology standards). Keywords following the abstract should be representative of the research content of the thesis/dissertation with 3-5 words, separated with comma, but with no punctuation sign after the last.

Sample:

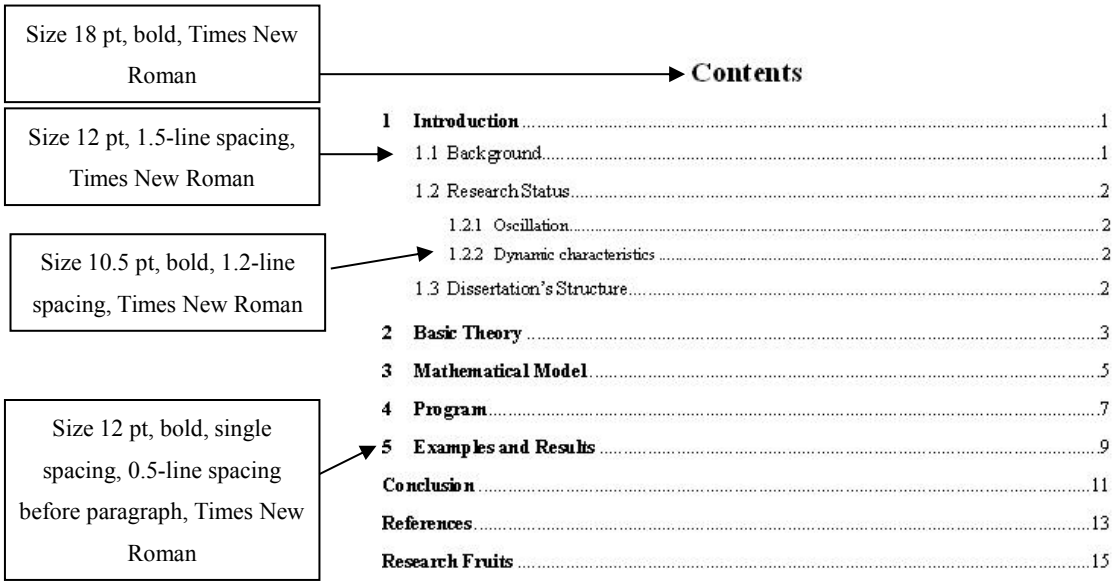


English Abstract: An English abstract is required for international communication. The English version of the abstract should be consistent with that of the Chinese version and should be printed in the Times New Roman with the same font size as the Chinese version.

4.5 Contents

It should be consist of three ranks: chapter numbers, section titles and item titles. It should include all the parts of the dissertation.

Sample:



4.6 Lists of Diagrams and Abbreviations/Acronyms/Terms

If the thesis/dissertation contains many diagrams, the diagrams could be listed after the list of content. The list of diagrams should include serial numbers, diagram titles and page numbers. All symbols/ abbreviations/acronyms/terms used in the thesis/dissertation should be appended alphabetically to the list of diagrams.

4.7 Thesis/Dissertation Body

The thesis/dissertation body is composed of the introduction, main body, and conclusion.

4.7.1 Chapter Titles

Each chapter should begin on a new page. Generally, the chapter title should not contain abbreviations and punctuation marks, although in some cases acronyms are allowed. The chapter title should be no more than 15 words. The number of sections or sub-sections depends on their actual needs. The hierarchy of three-level headings is recommended for Science and Engineering in the format of Chapter (e.g., "Chapter One"), Section (e.g., "1.1"), Article (e.g., "1.1.1"); for Social Science and Literature, it is recommended to use the format of Chapter (e.g., "I"), Section (e.g., "(I)"), Article (e.g., "1"). The titles should be numbered in Arabic number in Times New Roman style.

4.7.2 Introduction

The introduction is the first chapter of the dissertation, which should describe the purpose, focus, methodology, experiments and corresponding results of the research. The introduction of the Doctoral dissertation should contain no less than 8,000 words, and the Master's thesis no less than 5,000 words.

4.7.3 Main Body

The main body of the thesis/dissertation is the core part of the thesis/dissertation. Generally, it contains the methodology, materials, equipment, and conclusion of the research followed by detailed analysis of results. The main body of the doctoral dissertation should contain 60,000 to 100,000 words, and that of the master's thesis 30,000 to 50,000 words.

4.7.4 Conclusion

The conclusion of the thesis/dissertation is presented as a separate chapter without the chapter number.

The conclusion is a summary of the whole thesis/dissertation, but not a simple repetition of previous chapters. It aims to concisely summarize the creative ideas, findings, or significance of the research both accurately and completely. It may put forward some problems to be probed into or make suggestions for further studies.

If the research cannot reach any conclusion, necessary discussions are still allowable.

4.8 References

All works, which have been used or quoted in the research in one way or otherwise, should be referred here to avoid the plagiarism.

All items in References should be edited, either in Chinese or in English, according to the following formats:

4.9 Appendix

Appendix is supplementary rather than essential to the thesis/dissertation. It should be attached at the end of the thesis/dissertation.

(1) Materials that would disrupt the organization and logic of the text, but must be noted in order to ensure the integrity of the entire thesis/dissertation, including more detailed information than the text, more in-depth descriptions of research methods and techniques, which are suggested to be made into a readable reference list and additional information that is useful for understanding the content of the text, etc.

(2) Materials that cannot be easily incorporated into the text because they are too large or taken from a copy.

(3) Rare and valuable materials that cannot be easily compiled into the text or contains technical details and detailed programs that require special confidentiality (such cases can be listed in a separate volume).

(4) Materials that are not necessary for the general reader to read, but have reference value for professional peers.

(5) Certain important raw data, excessively long mathematical derivations, calculation procedures, flow diagrams, structural diagrams, notes, statistical tables, computer printout files, etc.

4.10 Research Outcomes

As for a Doctoral dissertation, research outcomes include the academic outcomes made during PhD study period, including the applicant's published papers, registered patents and obtained awards, and the research projects conducted during PhD study period, including the name, source and duration of the project, and the main work the author undertakes.

As for a Master's Degree thesis, academic outcomes made during master study period only include the applicant's published papers and works, registered patents, and awards.

The writing style is the same as that of References.

4.11 Acknowledgments

In this part, the author is to express his or her gratitude to the tutor and the other persons & organizations that have contributed to the present research work.

4.12 Author Profile

This is required for the Doctoral dissertation only.

It consists of the name, gender, nationality, birth date, birth place, education background, professional interests of the author, and his or her achievements during the PhD period.

4.13 Archiving

4.13.1 Archiving of Graduate Student Degree Approval Materials

The secretary of the Defense Committee shall submit the complete degree approval materials and the original vote to the graduate teaching secretary of the training school within 3 days after the defense, and enter the defense resolution into the Graduate Education Management Information System at the same time.

The "Degree Approval Materials (full set)" provided by graduate students for archiving contain 4 copies of "Doctoral Degree Approval Materials" and 3 copies of "Master's Degree Approval Materials" (4 copies for those with special conditions), among which a full set of Qualification Examination Form should be attached by those with the equivalent educational level. The "Transcript of Graduate Courses" in the original document of the degree approval materials, which is put into the graduate student's personnel file, must be stamped with the red seal of the academic affairs of the training school. The "Notification of Degree Award (Original)" should be bound on the last page of the original copy of the "Degree Approval Materials".

International students' degree approval materials should be written and filed in Chinese (English copies can also be attached).

4.13.2 Archiving of Graduate Student Thesis/ Dissertation

After the completion of the thesis/dissertation defense, the applicant should finalize and print the dissertation (using standard printing paper) after revising it according to the opinions of the reviewer and the defense committee under the guidance of the supervisor, and then bind it with the prescribed cover at the designated place. The applicant should submit the final version of the full dissertation as required, while the number of copies submitted should be handled according to the following requirements.

(1) Printed Version

Doctoral Dissertation: For the final version of the full text of the doctoral dissertation (including the doctoral dissertation written by the student with equivalent education level), 4 copies are required to be submitted for the public ones; 1 copy is required for the confidential ones (the copy of the "Confidential Dissertation Opening and Confidentiality Approval Form" should be bound at the end of the dissertation and before the back cover), and plus the original and 2 copies of the "Confidential Dissertation Opening and Confidentiality Approval Form".

Master Thesis: For the final version of the full text of the academic master's degree thesis (including the master thesis written by one with equivalent education level), 3 copies are required to be

submitted for the public ones; 1 copy is required for the confidential ones (the copy of the "Confidential Dissertation Opening and Confidentiality Approval Form" should be bound at the end of the dissertation and before the back cover), plus the original and 2 copies of the "Confidential Dissertation Opening and Confidentiality Approval Form". For professional master's degree thesis, 2 copies of public thesis and 1 copy of confidential dissertation should be submitted; confidential thesis should be submitted with 1 copy (the copy of the "Confidential Dissertation Opening and Confidentiality Approval Form" should be bound at the end of the dissertation and before the back cover), plus the original and 1 copy of the "Confidential Dissertation Opening and Confidentiality Approval Form".

(2) Electronic Version

Content and Format: The content should be the same as that of the printed version of the finalized thesis/dissertation, and the document format should be WORD or PDF. Confidential dissertation is not required to be submitted electronically, but the public dissertation must be submitted in electronic version. The specific submission method is as follows: one can submit his/her thesis/dissertation through the online system by entering the home page of Beihang Library (http://lib.buaa.edu.cn), clicking "Dissertation Submission", after the "Dissertation Submission System" is displayed, follow the instructions to complete the online submission of the thesis/dissertation. One can also copy the thesis/dissertation on CD, USB disk or floppy disk and send it to Interview Department of the Library.

(3) Submission Process

In the following flow chart, the number of papers refers to the number of printed papers unless otherwise specified.

All degree applicants are required to submit Within one week after passing the dissertation defense:
